

Measuring for Curtains

Measuring Tips:

Use a metal tape measure for best accuracy.

Measurements should be taken in cm, to the nearest 0.5cm.

Always double check your measurements for accuracy.

1 Choose Your Curtain Type

Depending on the style of curtains you're looking for, you'll need to measure slightly differently. If you're integrating a motorised or battery operated system, there are extra considerations to bear in mind, too. Our team are always happy to advise on the best style for your space and home, so please feel free to get in touch with any questions.

Pleated Heading on a Pole

Pleated Heading on a Track

2 Choose Your Curtain Length

Depending on the look and effect that you want from your curtains, you'll need to measure for the correct length. Use our handy guide to help you get the perfect length curtains.

Curtain Length	Windowsill Length	Below Windowsill	Floor Length
Measurement	To Windowsill - 1cm	To Windowsill + 15cm	To Floor + 1cm

3 Time to Measure

Use our helpful guides to measure your curtain width and drop, then write them down in the space below.

Pleated Heading on a Pole

W - Width of Pole between finials

D - Drop from the Pole Eyelets to your desired length

Pleated Heading on a Track

W - Width of Track

D - Drop from the Track Eyelets to your desired length

	Window Name	Width	Drop
